WORK EXPERIENCE

Blossm Inc; Frontend Developer - Freelance

A marketplace to buy, sell, and trade plants. 04/23 – present

- Revamped the entire website to enhance user experience and functionality.
- Developed landing pages for Google Ads campaigns, contributing to increased user engagement and conversions.
- Strengthened SEO efforts to improve the website's visibility in search engine results.
- Created a dedicated page to promote Blossm plant sellers, showcasing seller profiles and plant inventory.
- Implemented Google Analytics click conversions across the website to track user sources and measure effectiveness.

Demyst; Frontend Developer

Remote

Series E funded data startup providing external data to large enterprises via APIs 06/21 – 1/23

- Built the User Interface for a banking client's Customer Portal and Banker's Portal to help automate lending.
- Helped maintain and build the Demyst Design System UI components in Storybook.
- Developed several new features for the core platform Demyst.com.
- Deployed the platform to different environments using Jenkins CI/CD.
- Implemented end to end testing with Cypress and implemented unit testing with Jest.
- Built the User Interface using JavaScript, React.js, HTML, CSS, Styled Components, Less, Redux and Recoil.

WORK EXPERIENCE (CONTINUED)

Lifeshack.com; Frontend Developer

Los Angeles, CA

Remote jobs search platform 11/20 - 5/21

- Made every page on the platform mobile responsive.
- Created various components for Desktop and Mobile.
- Created mobile and desktop job filters for remote or hybrid positions.
- Implemented GraphQL endpoints on the front-end using Apollo Client.
- Built the User Interface using TypeScript, Next.js, React.js, HTML, CSS, GraphQL, and useContext.

Macias Gini & O'Connell LLP; Senior Associate

San Diego, CA

National Middle-Market Accounting/Consulting firm 12/18 –5/20

RSM US LLP; Consultant

San Diego, CA

5th largest Accounting/Consulting firm in the United States 06/16 – 11/18

PROJECTS

Find a pet

GitHub: <https://github.com/nickgusd/Find-A-Pet> | **Deployed** <https://find-a-pet.herokuapp.com>

Summary: A full stack platform that allows a user to search for different types of pets and breeds based on their location. The user can also view rescue organizations and save their favorite pets. A user can also filter for a pet based on several different attributes!

Responsibilities: I built the entire front end as well as the backend for the platform. I built the UI with React, Redux, using components from Semantic UI as well as my own reusable components. On the backend, I setup models, controllers, routes, and a server using Node.js, Express, Mongoose, and Mongo DB. I also integrated Auth0 for user authentication and used the Petfinder API for fetching animal data.

Tech Stack: TypeScript, React.js, Redux toolkit, Semantic UI, Axios, Node.js, Express, REST APIs, Mongo DB, Mongoose, Auth0, Petfinder API, React-icons.

Rick and Morty

GitHub: <https://github.com/nickgusd/rick-and-morty> | **Deployed:** <https://rick-and-morty-nickgusd.vercel.app/>

Summary: An application that allows a user to search for any character in the Rick and Morty universe, view what episodes each character is in, and view the characters in each location of the Rick and Morty universe.

Responsibilities: Developed the entire UI with React and fetched data using the Rick and Morty GraphQL API. Used the OpenAI API to retrieve the description for each episode.

Tech Stack: JavaScript, React.js, Redux, GraphQL, OpenAI API, Semantic UI React, Rick and Morty API, React Icons

Ernie Ball Landing Page

GitHub: <https://github.com/nickgusd/Landing-Page> | **Deployed:** <https://landing-page-nickgusd.vercel.app/>

Summary: This website is a product landing page inspired by my favorite guitar series, the Ernie Ball Music Man!

Responsibilities: Developed every feature on the website.

Tech Stack: JavaScript, React.js, Material UI, React Bootstrap, PayPal Sandbox
