SUMMARY

Full Stack Web Developer with a background in Accounting/Consulting, Finance, and Real Estate who aspires to continually learn, add value, and to become a team leader. Effective at understanding a market demand, and developing applications that will allow individuals to solve their problems and meet their needs. Worked in Consulting and demonstrated strong attention to detail, problem solving skills, and business acumen to meet clients' needs.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3, JQuery, React.js, Markdown, Bootstrap, Handlebars.js, APIs, Node.js, Express.js, MySQL, MongoDB, Mongoose, Sequelize, and AWS Serverless framework.

Applications: Visual Studio Code, Terminal, Screencastify, Git, Github, Homebrew, Xcode, Postman

PROJECTS

VaxDash

Github: <https://github.com/Lifeshack/vax-dash> | **Deployed:** <https://vaxdash.us/>

Summary: A platform that allows users to make an informed decision about whether or not to get the COVID-19 vaccine, view the vaccination progress, determine vaccine eligibility in their state, and locate vaccine clinics.

Responsibilities: Performed file setup for both Desktop and Mobile. Rendered D3 Map for US States with Albers USA projection data. Created different sidebars for the Dashboard, FAQs, and Vaccine Safety Pages. Performed research and added content for the Vaccine Safety and FAQs pages.

Tech Stack: React.js, JavaScript, D3.js, AWS Serverless Framework, DynamoDB, Material UI

Music Exchange

Github: <https://github.com/nickgusd/Muse-eXchange> | **Deployed:** <https://musicexchange2.herokuapp.com/>

Summary: A marketplace allowing musicians to sell songs/tutorials/videos directly to fans for a negotiated fee.

Responsibilities: Developed search bar functionality to allow a user to search for any profile and navigate to that user's profile. Created HTML and API routes to visit user profiles, purchase songs, save favorite users, and create and save requests. Created routes and controller functions to allow a user to edit their profile.

Tech Stack: HTML, CSS, JavaScript, React Bootstrap, React.js, Parallax, Calendly, React Media Players, Material-UI, Node.js, Express.js, MongoDB, Mongoose, and Cloudinary.

Tinder for Restaurants

Github: <https://github.com/tpacba/tinderforrestaurants> | **Deployed:** <https://vast-lowlands-43566.herokuapp.com/>

Summary: Application that allows a group of people to decide on a restaurant together by liking or disliking restaurant choices. When the members of the group narrow their options to a final restaurant, the group is presented with a match.

Responsibilities: Developed the SQL database and tables, models, API routes, HTML routes, Yelp API call, appended information, matching functionality, and CRUD requests. Performed initial file setup, server.js, and delegated project tasks

Tech Stack: MVC, JavaScript, jQuery, Node.js, Express.js, Sequelize, MySQL

WORK EXPERIENCE

Lifeshack.io; Full-Stack Developer

Los Angeles, CA

Remote work company tracking platform

11/20 - present
